I Shares:	\$1 million
A and C Shares:	\$2,500
Dividend Frequency:	Annually
Trailing 12-Month Distributions:	\$0.2085 per share
NAV (3/31/20):	\$9.80

WHY A MANAGED RISK STRATEGY?

- Risk of global and domestic losses due to interest rate fluctuations
- Equity valuation based market could be a disappointment. Bull markets do not last
- Geopolitical stress could present shocks to the equity markets

¹ S&P 500 Index: An index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe.

² No minimum initial investment for various wrap-fee programs and other sponsored arrangements. I Shares and A Shares are available at NAV for wrap accounts.

³ For wrap fee and qualified accounts, minimum initial investment may be \$10 million as approved by the manager.

The Portfolio will borrow money for investment purposes. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk while increasing investment opportunity. The dollar value of the Portfolio's foreign investments will be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded.

FUND OBJECTIVE

The Fund's primary objective is capital appreciation. By combining a long U.S. large cap equity portfolio with options hedging strategies, the Fund seeks to provide enhanced protection during market downturns. The investment is designed to mitigate losses in both moderate and large down markets while seeking steady compounded returns over a full market cycle.

DEFENSIVE EQUITY CHARACTERISTICS

- Equity exposure with less volatility
- Seeks low correlation to bonds
- Seeks reduced risk of large drawdowns through systematic put strategy
- Offers the potential of more stable compounded return stream

WHY A MANAGED RISK STRATEGY

Investors are concerned that traditional diversification strategies may not work in the future. Fixed income may not "zig" when equities "zag". Coupled with the poor performance over the last decade of many other strategies touted as non-correlated performance enhancers (e.g. managed futures, gold, non-traded REITs etc.) client portfolios may be poorly diversified and be at risk of large drawdowns.

Unfortunately, without effective diversification, many clients who experience a deep and prolonged drawdown sell at the worst time.

INVESTORS ARE SEARCHING FOR DIVERSIFICATION THEY CAN COUNT ON.

The James Alpha Managed Risk Domestic Equity Fund can provide clients with dependable and predictable diversification and relatively low volatility.

HOW TO POSITION THE FUND

- 1. Equity Complement.** Help clients stay invested in US large cap equities by attempting to reduce the depth and duration of equity drawdowns.
- 2. Risk Budget Tool.** JDIEX's low volatility profile as a core holding provides the opportunity to increase returns in Satellite positions.
- 3. Alternative Sleeve Core Position.** JDIEX can deliver diversification and low correlations to US LC equities in drawdowns.
- 4. Complement to Fixed Income Portfolio MPT Diversification.** JDIEX can provide diversification and low correlation to equities along with reasonable yield.

There is no assurance that the Portfolio will achieve its investment objective. The Portfolio share price will fluctuate with changes in the market value of its portfolio investments. Mutual Funds involve risk including possible loss of principal.

Alpha is the excess return of a fund relative to the return of a benchmark index. **Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. A beta of less than 1 means that the security will be less volatile than the market, while a beta of greater than 1 indicates that the security's price will be more volatile than the market.

FIRST QUARTER 2020

INVESTMENT PERFORMANCE⁴ 3/31/20

Share Class	YTD	1-Year	3-Year	Since Inception
I Shares:	-6.84%	-1.92%	3.44%	2.81%
S&P 500:¹	-19.60%	-6.98%	5.10%	6.68%
Options-based Category:	-13.08%	-6.68%	-0.44%	0.59%
S Shares:	-6.67%	-1.41%	N/A	4.20%
S&P 500:¹	-19.60%	-6.98%	5.10%	4.42%
Options-based Category:	-13.08%	-6.68%	-0.44%	-1.41% ⁵

Investors cannot directly invest in an index and unmanaged index returns do not reflect any fees, expenses, or sales charges. Performance data quoted above is historical. Past performance does not guarantee future results and current performance may be lower or higher than the performance data quoted. The investment return and principal value of an investment will fluctuate, so that shares when redeemed may be worth more or less than their original cost. The Fund's management has contractually waived a portion of its management fees until December 31, 2020 for A Shares, I Shares, and C Shares and until December 31, 2020 for S Shares. The performance shown reflects the waivers without which the performance would have been lower. 5.75% is the maximum sales charge on purchases of A Shares. For performance information current to the most recent month-end, please call 888.814.8180.

Expense Ratios

Class	Before Reimbursement	After Reimbursement
S Shares	2.03%	1.46%
I Shares	2.08%	1.92%
A Shares	2.31%	2.11%
C Shares	3.05%	3.05%

The Fund's investment adviser has contractually agreed to reduce its fees and/or absorb expenses until at least December 31, 2020 for I Shares, A Shares, C Shares, and until December 31, 2020 for S Shares to ensure that net annual operating expenses will not exceed 1.79% (I Shares), 1.99% (A Shares), 3.0% (C Shares), and 1.34% (S Shares), subject to possible recoupment from the Fund in future years.

⁴ Inception date for I Shares, A Shares, and C Shares is 8/3/2015. Inception date for S Shares is 8/17/2017. Total return for all periods less than one year is an aggregate number (not annualized) and is based on the change in net asset value plus the reinvestment of all income dividends and capital gains distributions.

⁵ Data analysis period 7/31/17-3/31/20.

OPTION STATISTICS⁶

	Calls	Puts
% Hedged with options	100%	>140%
Weighted average days to expiration	4.00	11.08
Weighted average call premium to earn	0.50%	NA
Weighted average put premium cost	NA	1% - 1.25%

⁶ Weighted average days to expiration is the weighted average time until the expiration date of the options. Weighted average call premium to earn is the weighted average potential cash flow to be earned from written call options measured as a percentage of stock assets. Weighted average put premium cost is the weighted average price of put options owned measured as a percentage of stock assets.

PORTFOLIO ATTRIBUTIONS⁷

Alpha to S&P 500	0.09%
Beta to S&P 500	0.38%

⁷ Source: StyleAdvisor, 3/31/20.

Important Fund Risks

Derivatives may be volatile and some derivatives have the potential for loss that is greater than the Portfolio's initial investment. If the Portfolio sells a put option, there is risk that the Portfolio may be required to buy the underlying investment at a disadvantageous price. If the Portfolio sells a call option, there is risk that the Portfolio may be required to sell the underlying investment at a disadvantageous price. If the Portfolio purchases a put option or call option, there is risk that the price of the underlying investment will move in a direction that causes the option to expire worthless. The Portfolio's ability to achieve its investment objective may be affected by the risks attendant to any investment in equity securities.

Shares of ETFs have many of the same risks as direct investments in common stocks or bonds. In addition, their market value is expected to rise and fall as the value of the underlying index or bond rises and falls. It is possible that the hedging strategy could result in losses and/or expenses that are greater than if the Portfolio did not include the hedging strategy. The use of leverage by the Fund or an Underlying Fund, such as borrowing money to purchase securities or the use of derivatives, will indirectly cause the Fund to incur additional expenses and magnify the Fund's gains or losses. Because a large percentage of the Portfolio's assets may be invested in a limited number of issuers, a change in the value of one or a few issuers' securities will affect the value of the Portfolio more than would occur in a diversified fund.
